Some projects I had built :

* Al Ber Association in Wadi Muharram An advertising website using Embraco.

* Medicine Charitable Association:

A program on the cloud to manage the beneficiaries of the association's services

A program for managing the pharmacy of the association

A program to manage the distribution and delivery of medicines to beneficiaries

A special program to manage the delivery of medicines to beneficiaries

- An interactive map showing the locations and statuses of the beneficiary's disbursement using Google Maps

A volunteer management program to deliver medicines to beneficiaries

Programs for managing the financial resources development department in the association

A program for managing the human resources department of the association

- An integrated system and portal for the association's beneficiaries to enter and follow up on their requests and the status of their file

An electronic market programmed from scratch to receive donations for beneficiaries linked to an integrated control panel.

- Group text messaging system

A simplified system for managing support tickets between the association and the Software Solutions Corporation

- Dozens of various and complex reports have been completed successfully, thank God

Programming the Speck Labbaik application using the Zamrin form with its control panel

* South Asian Pilgrims Foundation:

- A program for managing the meetings of the Chairman of the Board of Directors

- A program to manage the reception of buses of pilgrims from the airport to the residence (linked to the Ministry of Hajj)

- A program for entering the archive

A program to identify the organization's seasonal employees of more than 1,500 employees

- On the web service to accept data from the institution and the Ministry of Health and Umrah

- A program to manage the shareholders' department in the institution

- And many of the program and pages of the institution and dozens of reports

* Triple Technology Co

- I was the head of the development team. We built a program to manage schools and students in the Royal Commission in Yanbu Al-Sinaiyah

* Atheer Information Technology Company

- I work as part of a team to build an integrated ERP program and I am responsible for building the department of inventory and customer management, and the construction of this department has been 80% completed
