WORK EXPERIENCE

Appspro Part of Accenture

July 2020 – Dec 2022

Oracle BI Consultant & Data Engineer

- **Ministry of Housing and Urban Affairs:** I Worked on Designing and creating a data warehouse, ETL, and using BI to translate the data into dashboards that meet the customer needs and help in taking business decisions and solve problems within the business. Furthermore, I worked on multiple programs like Data Modeler, ODI, RPD, OAC and Oracle Classic.
- **NHC (National Housing Company):** I Worked on the house development system, ran through the whole BI cycle from taking business requirements into building a dashboard that meets the customer needs, using the tools to integrate and transform data and denormalize it.
- **TBC:** Create and Enhance Finance, Procurements, Human resources and project managements Dashboard using OAC to deliver a dashboard based on business.
- **Ghabbour:** I build reports for the business user based on business requirements, the reports cover all areas of Hiring modulus.
- **SANS:** Integrating and Implementing dashboards from one system to another, covers all areas of business.
- **SAMI:** I was responsible for creating and enhancing reports and dashboards that focus on human resources modules, also after a while we have this project from cloud to on premise, recreating all of the dashboards for Finance, Procurement and Human resources.
- **Technology Analyst Experience.**

Technical Support

- **Reports:** Creating multiple reports and making a unique layout for each report.
