[hussainalrebeh@gmail.com](mailto:hussainalrebeh@gmail.com)

Result-driven and self-directed IT and data analytics professional with demonstrated success in the digital transformation and automation of enterprise processes. I have been praised for having a stellar technical, non-technical, and data visualization skills that enhances decision making. I possess a unique perspective on technical issues, effective and out-of-the-box solutions, and unyielding attention to detail while continually exploring ecosystemic ways to improve and promote quality of services.

## Education

**University of Central Oklahoma**  
**Management Information Systems, Bachelor**

*Edmond, OK, USA*  
**December 2017**

## Professional Experience

**Senior Process Development Specialist, Binzagr Factory for Insulation Materials (BFIM).**      **May 2019-Present**  
*Jubail, Saudi Arabia*

Plan a cost-effective digital transformation and automation of enterprise processes to enhance the processing speed and quality of data. Evaluate the current digital processes capability and provide development recommendations. Delivered projects:

- **BFIM Portal:**
  - Binzagr Time and Labor (BTL) Project.
  - Binzagr Archive Digitization System (BAS).
  - Service Ticketing System.
  - Inventory material request, dispatch, and purchase requisition digital system.
  - Procurement department quotations request and purchase ordering digital system.
  - Logistics department vehicle, driver, fuel, and services digital management system.
  - Accommodation manpower registration and transfer digital system.
  - Manpower Mobilization Digital System
  - Expense Request and Cash Claim Digital System.
  - Department data visualization dashboards.
- **Cybersecurity:**
  - Identity Authentication Procedures
  - Password Policy Enforcement.
  - Access Control Management.
  - Workflow setups and designs.
  - Processes validations.

**Digital Transformation Supervisor, Gulf Climate for Air Conditioning.**

**January 2017-Present**  
*Qatif, Saudi Arabia*

Created data sets and digital processes for a newly started organization, analyzed and updated its large set of sales and services data to help management in decision making. As a part of change management, I have automated the financial processes to optimize transactions, customer invoicing, VAT, profits, and expenses via an integration of an ERP system for small establishment.

**Senior Freelance Photographer, Self-Employed****January 2008-Present**

I am a self-made freelance photographer who applies the technical expertise toward photography to increase the quality of equipment which would reflect on the quality of outcome work to meet customer needs. I possess a home-based high-quality workstation I have built myself for enhancement and after-shoot pictures digital retreatment software supported by high-quality internal and external peripherals. A digital photography portfolio is often demonstrated on 500px.com and instagram.com/hussainalrebeh.

**Accountant, Alfaraj Distribution Company****May 2006-July 2007***Qatif, Saudi Arabia*

At a supply chain company, I had many responsibilities, including but not limited to: preparing the assets, liabilities, data entries, and financial transitions. Analyzing account information, capital, and documenting goods imports and exports to local grocery stores in Qatif.
