Travel
Listener

Training and Certifications

VMware
Network(CCNA)
ITIL, PMP,
CISSP, CISM and Security+.
NSX course
Windows Admin.
Risk and Issue Management
Microsoft Office (Word, Excel and
PowerPoint) plus Project and Visio

Profile

6 years of experience, I have achieved a lot in engineering and project management, Analytical Thinking, and Problem Solving from installation to delivery in the security and communications department. Also IT Professional with experience in Information and Systems Security (Linux, Windows, VMware). Expert in a variety of security software, engineering, networking, and operating systems. I have an awareness of Saudi Aramco and HCIS standards. Analytical Thinking and Problem Solving

Experience

2019 – PRESENT

Analyst, System Operation • Tamkeen Technologies • Riyadh

I successfully Operate all the hardware, software app, and network, and support all the systems for Tamkeen Project.

I successfully achieved do Work on Riverbed to monitor the entire objectives device (network, servers, application device) for the Tamkeen project and the client. Contact all the team “engineers and department managers” to resolve all the issues.

Excellent, I succeeded in solving problems and sending reports

I got work done on VMware vRealize Operations Manager (create a dashboard, monitor all VM)

January 2016 – March 2019

Project Engineer • WIPRO • FGP (Fadhili Gas Plant) • (communicate & security)

I have invented ways to coordinate and communicate with the contractor, sub-contractor, and client to complete the project.

I have Reviewed all technical and Management documents (MR, RMA, TBE, and TQ), drawings (Redline and Shop drawing), and design (datasheet for all the devices to meet the requirement) in record time with few resources

I successfully complete the entire configuration for the Cisco switch, Router, and IP telephony installing the industrial, switch (MICROSENSE) I/O module (MOXA), and APU (Alarm Processing Unit) for FOFSS This was a great challenge for me because it is the first time I deal with these devices.

I achieved the Target to complete all Security System managements, designs, and Documents In record time.

I did create and prepared an engineering design package (EDP)

I successfully achieved Vendor evaluation and studied as per the requirements and standards.

Education

January 2016

Diploma • Computer Network • Institute of Public Administration

Riyadh

Study in windows, Linux and cisco
Installing and administrator all the system.
