One year Intensive English Program

Al Qurayat Chamber of Merchant and Investment

Management and Investment Diploma

Arizona State University

Electrical System Engineering Sophomore Student

Communication

Working in the retail business made me develop a great skills of communication as I interact with my customers to helps them get what they want and be satisfied with it to come again and to trust the company and the brand moreover to build a great relationship with every person I serve. I would communicate with the costumers not only by words but also by showing them and listing to them and teaching them about the product or the service .

Leadership

Leadership to me is building a team where each member loves doing his/her responsibility and thrive to do more to grow within the company. As a leader I would sit up goals for my team, and explains to each one of them their part focusing on their strength and improving their weakness . train them for the work and for their next level. Follow up their progress and encouraging them to do better.
