SAP Projects

Portfolio Project Management PPM – Tal’aat Mostafa Group (TMG) - Egypt

Designing and developing 3 custom SAPUI5 like FIORI applications alongside with an OData service. First application is used to store some configuration data to be used in next two applications. The other two applications are mainly developed to auto calculate and save portfolio initiative and item values based on some user inputs and a combination of configuration.

Extensible Customer Centric Real Estate (xCCRE) - Egypt

Develop a custom real estate SAP UI5 like FIORI application. Work closely with technical and functional team members. Work closely with ABAP (backend) developers, work on ABAP issues, trace and program if required. Build and maintain RESTful OData service on SAP NetWeaver GW and Implemented authorization solution to the SAP UI5 application. The solution is tailored based on customer requirements. Work and support on application deployment for each customer.

The solution was developed, configured and deployed for the following customers:

- IWAN Developments
- M2 Development
- Misr Italia Group
- Tal’aat Mostafa Group (TMG)
- Madinet Nasr for Housing & Development (MNHD)

Debit Note – Mezzan Holding Co. – Kuwait

Developing 3 custom SAPUI5 like FIORI applications. One to create, edit and delete debit note memos, another is a workflow application, the third is to report debit note different memo types based in some search criteria. All the applications are deployed to FLP.

Van Sales Approval – Mezzan Holding Co. – Kuwait

A custom SAPUI5 like FIORI workflow application to approve/ reject different sales orders. All application data was retrieved from SAP ERP backend system through OData service.

Sourcing – MOD Ministry of Defense

United Company of Pharmacists

Design and Implement set of HCM custom Fiori Apps with its workflow process: Overtime Request, Permission Request, Contract Renewal, and Probation Evaluation. Also, some other MM custom Fiori apps for Sales Picking, Sales Picking Control, and Inventory Sales Picking. With these Fiori apps created required info types, screens, ALV reports, PDF Forms, Executable programs, maintenance views, Workflow also OData and its implementation.
